Customer Problem Statement Template:

I am	Person who requires medical support or assistance to remind me around the clock. Also, I'm an absent-minded and elderly person.
I'm trying to	To take medicines without the help of caretakers/doctors who would remind me all time. To remember to take prescribed medicines on time and not to miss out on my daily medication which might cause serious issues in future.
but	I often fail to remember to take medicine or to take which particular medicine at that specific time. Otherwise, because of many tablets which eventually tends to be missing out of few tablets.
because	they might be occupied with some other work or assuming that they already took their tablets.
which makes	my health conditions deteriorate in long run.
